

This technical drawing provides a detailed overview of the SLH 5500 Universal Telescopic Arm lift system, including its components, dimensions, and installation requirements.

Panel 1: Shows the top view of the lift with labels for power supply entry, hydraulic power unit, operating column, and ceiling clearance requirements.

Panel 2: Shows the side view of the lift with dimensions: 2807, 2779, 622, 1166, 2720, and 80. It also includes a table for total height (GH) values.

(**) GH	Gesamthohe / total height
GH 3.6	3657mm / 12 ft (USA)
GH 3.8	3797mm / 12.45 ft
GH 4.1	4117mm / 13.5 ft
GH 4.8	4780mm / 15.7 ft
GH 5.5	5500mm / 18 ft

Panel 3: Shows the front view with dimensions: min. Durchfahrbreite 2541, 251, 622, 1166, 2720, and 80. It also shows the optional second operation unit.

Panel 4: Shows the rear view with dimensions: min. 230°*, 251, 622, 1166, 2720, and 80. It also shows the optional second operation unit.

Panel 5: Shows the foundation detail with dimensions: max. ca. 2004, 129-204, and 80. Labels include: Quertraverse (cross beam), Verlaengerung in verschiedenen Hoehen (height extension in different heights available), Abdeckung Sicherheitsklappe (cover for safety latches), Oeltank (oil tank), OKF = Oberkante Fertigfußboden (top of finished flooring), and TTF = top of finished flooring.

Panel 6: Shows the side view of the lift with foundation detail, including concrete reinforcement BSIG Q 335A (Ø8/150).

Panel 7: Shows the recommended foundation detail "H" (3:1) with dimensions: 850, 820, 550, 300, 30, 495, 525, 615, 235, and 30. Labels include: Fundament (bed-plate / foundation), Anschlussarmierung zum vorhandenen Fundament vorsehen (plan an armoring with the existing foundation), Betonqualität min. C20/25 mit Bewehrung (quality of concrete C20/25 with armoring), and Grundplatte 20 dick (base plate 20 thick).

Panel 8: Shows the recommended foundation detail "H" (3:1) with dimensions: 850, 820, 550, 300, 30, 495, 525, 615, 235, and 30. Labels include: Empfohlene Duebel sind dem Pruefbuch zu entnehmen (Recommendations for dowels can be found in the manual), Die Mindestverankerungstiefe des Duebels beachten (Observe the min. anchorage of the dowels), and Die Montagevorschrift des Duebelherstellers beachten (Observe the regulation of the dowel manufacturer).

Bottom Section:

- Dimensions:** 255SLH00005/255SLH00006 (3D CAD-Modell)
- Projection Method:** ISO 5456-2
- Designation:** SLH 5500 ADVANCED UNI / SLH 5500 PREMIUM UNI / 4-Fach Universaltragarme (UNI)
- Drawing Number:** 9569
- Notes:** Alle Maße in mm! / all dimensions in mm! Mass- und Konstruktionsänderungen vorbehalten! / dimensions and design changes reserved!
- Table:** A table for modifications (ind., Aender. / modification), date (Datum), and name (Name).
- Logos:** Nussbaum logo.
